

**2021 NMRPTC meeting; Daniela Roth, chair.**

11 species were proposed for addition or deletion from the list. The Council voted to add 8 new species to the list (*Ipomopsis wrightii*, *Berlandiera macvaughii*, *Asplenium scolopendrium* var. *americanum*, *Erythranthe plotocalyx*, *Phemeranthus rhizomatus*, *Lechea mensalis*, *Muilla lordsburgana*, *Ipomoea gilana*) and delete 2 (*Rubus aliciae*, *Penstemon pseudoparvus*). One was considered peripheral in the United States and therefore not added (*Ageratina lemmonii*). An additional 30 plant species were transferred from the Dropped List back to the Strategy List, due to lesser restrictions for inclusion on the Strategy List. Three were proposed for addition (*Echinocereus x roetteri*, *Coryphantha scheeri* var. *uncinata*, *Asclepias uncialis*), and 6 were voted to be added back to the Dropped List (*Asclepias ruthiae*, *Grindelia decumbens* var. *subincisa*, *Grindelia havardii*, *Xanthisma viscidum*, *Perityla lemmonii*, *Escobaria orcuttii* var. *koenigii*).

- During the March meeting an additional 26 species were reviewed. *Sicyos glaber*, *Astragalus iodopetalus*, *Agastache mearnsii*, *Malaxis abieticola*, *Delphinium sapellonis*, *Heuchera glomerulata*, *Heterotheca sierrablancensis*, *Heterotheca cryptocephala*, and *Cuscuta draconella* were added to the list of rare plants. 15 species were dropped from consideration, including *Euphorbia strictior*, *Astragalus waterfallii*, *Rumex orthoneurus*, *Ipomopsis congesta* ssp. *matthewii*, *Cladium californicum*, *Epipactis gigantea*, *Spiranthes romanzoffiana*, *Rosa stellata* var. *mirifica*, *Eurybia horrida*, *Packera neomexicana* var. *metcalfei*, *Dalea scariosa*, *Sclerocactus papyracanthus*, *Anulocaulis leiosolenus* var. *gypsogenus*, *Physaria lata*, and *Stellaria sanjuanensis*. Two species, *Mentzelia holmgreniorum* and *Rosa stellata* var. *erlansoniae* remain on the list of species to be considered until further information becomes available.
